

# SafetyLine <sup>tm</sup> Remote Worker Monitoring System

## Alone Worker

Alone worker checks into SafetyLine <sup>tm</sup> via cell phone, desk phone, blackberry, or any web enabled portable wireless device and sets next reporting time to SafetyLine <sup>tm</sup>.

SafetyLine <sup>tm</sup> monitored worker begins work. SafetyLine will call the Worker 5 minutes before the set check in time. In the event the worker fails to respond SafetyLine will call back worker in 5 minutes at the set check in time

If the worker fails to respond SafetyLine <sup>tm</sup> will declare an 'unconfirmed emergency' and proceed to contact the Lone Worker Safety Solutions Monitoring Center. Monitoring Agent will initiate emergency call out procedures as set forth by Client .

The worker can also initiate a panic emergency by pressing 1 button.

## On Call

Designated On Call Personnel accepts Unconfirmed emergency from Monitoring Center. Monitoring Center continues to monitor the event. On call logs onto SafetyLine <sup>tm</sup> or is given positioning and mapping coordinates if GPS is enabled. Voice logs of the alone workers location can also be accessed by on call or by the Monitoring Center Agent. In the event the Alone worker cannot be contacted, Emergency Services can be dispatched by Client or Monitoring Center.
